

4-core large-diameter optical fiber manufactured in the United States

Overview

Corning® Multicore Fiber (MCF) is engineered for the next generation of AI-driven data centers, delivering up to 4x the optical pathway density within the familiar 125-micron fiber footprint. By integrating four cores into a single strand, MCF enables a step change in bandwidth and simplifies. Corning Incorporated, founded in 1851 and headquartered in Corning, NY, employs over 58,000 professionals and records annual sales exceeding \$250 million. As a pioneer in fiber optic technology, Corning sets industry benchmarks through ongoing R&D investment and global market influence. Since inventing low-loss optical fiber in. Lightera Multicore Optical Fiber is an innovative approach to fiber design and has the potential to revolutionize the way data is transmitted, improving speed, efficiency, and performance. These companies are at the forefront of developing and supplying the essential infrastructure that powers modern telecommunications, data centers, and various other industries.
