

43 Busbar Connection

Overview

The KG43 connector is used for connecting Al-conductors to aluminium busbars or tin plated copper busbars in distribution boards, disconnectors, medium and low voltage transformer bushings. Max thickness of the bar 10 mm. SZ24 disconnector is used to simplify operation in fault situations and to. DIN 43 671 specifies the continuous currents for busbars at an ambient temperature of 35°C and an average busbar temperature of 65°C. The permissible busbar temperature is decisive when dimensioning the busbars. Amphenol's BarKlip® I/O products provide a convenient and customizable method of distributing high-current power between busbars, cables, and. Busbars set the benchmark for connecting key internal components within high-voltage powertrain assemblies, inclusive of inverters and motors.
