

48-core Russian fiber optic fusion splice box for emergency communication

Overview

Fiber optic splice closure for 48 cores. Mechanical performance comply with IEC10113-1 standards. FIMP-XLE splice boxes stand out as an ideal solution for industrial environments, combining a compact form factor with robust design features. The 48 Port Fiber Distribution Box provides 16, 24, 32 or 48 SC ports in a traditional two-layer design – a rear splice area for cable slack and splice protection, and a front interconnect area for SC ports. The FDB-48 is suitable for indoor or outdoor FTTX applications that support up to 48. AR-SC4P-48F-T is a small dome type fiber optic splice closure that used for fiber optic splicing and protection. Wall-mounting, aerial hanger and pole mounting. The tray fixing on the box is clip design, no need to use special tool to take off the tray, only by hand.
