

AI installation shows server disconnection

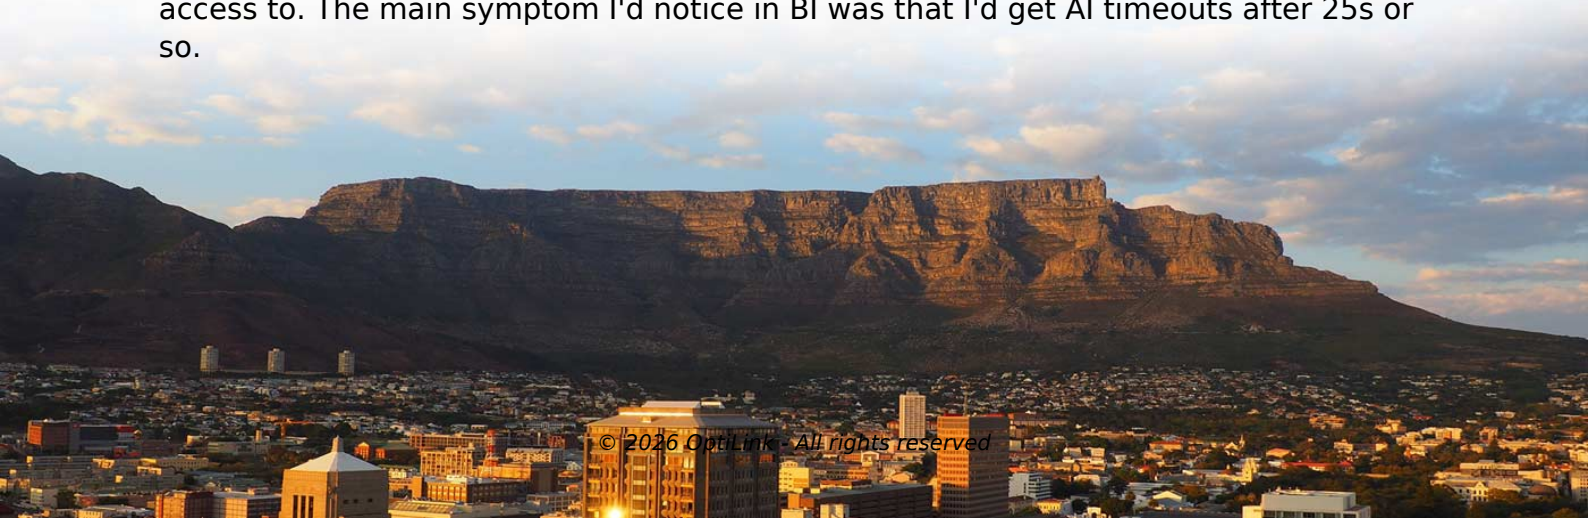

Overview

Common installation issues include problems with dependencies, runtime installation, module installation, and GPU support configuration. Ensure system packages are up-to-date. On Linux/macOS, run `apt-get update` or equivalent before installation. 8a) prior to installing the new version, which isn't showing up as a service (new architecture?

), and the setting AI tab shows. Installation issue of one or more Modules. Please post the issue on the module's Issue list directly To pick up a draggable item, press the space bar. While dragging, use the arrow keys to move the item. Check your connection and proxy settings How to disable AI-powered code completion?

How to know which LLM model is used in case of cloud completion in AI Assistant?

What is zero data retention mentioned on JetBrains AI. The error you're experiencing with the specified URL (error 500 with a server disconnected message) seems to be related to timing, and it's an unusual behavior for a typical API endpoint. It's worth noting that while I can provide general troubleshooting advice, I don't have direct access to. The main symptom I'd notice in BI was that I'd get AI timeouts after 25s or so.
