

All-optical SFP aggregation switch

Overview

These aggregation switches support advanced VLAN for flexible traffic segmentation, advanced QoS for prioritizing network traffic, IGMP/MLD Snooping for optimizing network performance, and comprehensive security capabilities against potential attacks. Equipped with eight SFP+ ports, two additional SFP28 ports and one RJ45 console port for configuration. With AXIS D8308 Fiber Aggregation Switch you can connect multiple Axis devices using fiber midspans over long distances. It also enables easy expansion by simply adding more fiber or network. An 8-port, Layer 2 switch made for 10G SFP+ connections. Faster replacement and priority support, covered for 5 years. High-performance 10G SFP modules for optimal connectivity. Aggregation switch for large-sized networks, or core switch for small and medium-sized networks Aggregation switch for small and medium-sized campus networks, with 4 x 1GE/10GE SFP+ uplink ports for high-speed data transmission; 48 x 1GE SFP ports, providing high-speed network experience for. Stack fiber and copper Cisco® Catalyst® 3850 switches together for more flexible network designs. Take advantage of a wide range of pluggable transceiver modules. Deployed as a top-of-rack (ToR).
