

Authentication Access Switch 800G

Overview

The Edgecore AIS800-320 is a high-performance, low latency switch for high-performance data centers. Breakout options include 2 x 400G, 4 x 200G, and 8 x 100G per port, with a maximum of 160 logical ports. 800G Ethernet emerges as the next-generation networking technology, delivering unparalleled bandwidth, improved energy efficiency, and scalable architecture to meet the demands of AI, cloud computing. Cisco N9364E-SG2 switches are 64-port 800G fixed switches. Artificial-Intelligence and Machine-Learning (AI/ML) applications are being used increasingly in today's data centers, and Cisco N9000 Series Switches have the hardware and software capabilities to provide the right latency. trum switches, purpose-built to accelerate data center fabrics. The SN5000. Designed specifically to enhance data center networks, the SSE-T8164 offers 64 ports at 800 gigabits per second. Offers reduced. Celestica's 800G Family of Network Switches are purpose-built to support cutting-edge AI/ML and HPC requirements.
