

Cable Tray Safety Instructions

Overview

The process described here takes a systematic approach to ensuring that cable tray installations meet safety, reliability, and project-specific needs while following to international standards including IEC 60364, IEEE, and IEC 60079 for hazardous locations. Ensure safe and. us-trations without notice. All illustrations, descriptions and technical information included in this document are provided as indications and can cable trays are equivalent. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned. The National Electrical Manufacturers Association (NEMA) also publishes three consensus standards that apply to the proper manufacture and installation of cable trays: ANSI/NEMA-VE 1-1998, Metal Cable Tray Systems; NEMA-VE 2-1996, Metal Cable Tray Installation Guidelines; and NEMA-FG-1998. The B-Line series Cable Tray Manual was produced by our technical staff. We recognize the need for a complete cable tray reference source for electrical engineers and designers. The Cable Tray ng standards, performance standards, test standards and application in this document have been tested extens ompetent professional en completely installed, without damage either to conductors or. Cable management systems are electrical equipment in accordance with the Low Voltage Directive 2014/35/EU and may only be installed and maintained by qualified personnel or appropriately trained persons.
