

Cable tray lateral seismic bracing accessories

Overview

Kit contains items needed for seismic bracing long cable tray runs. Predrilled tabs allow attachment directly to. When it comes to seismic rigid bracing system attachments for single hung pipe, duct, cable tray or any trapeze hung system, TOLCO seismic bracing products lead the industry with patented, innovative solutions to reduce installation time by up to 50%. The ease of creating fittings, carried out on site, as well as the wide range of unique and universal accessories gives complete freedom in routing combined with exceptionally fast. Cable trays are systems used for the safe transportation and protection of electrical cables, designed to fit the pathways within buildings and structural installations. Mechanical Support Systems New! Founded in 2006 as a subsidiary of Çemesan Group, which has been operating in the steel industry. We offer a pre-engineered, time-saving solution which braces and secures non-structural equipment within a building to minimize damage from earthquakes or seismic events.
