

Cisco Fiber Optic Switch Backup Configuration

Overview

Learn how to backup and restore Cisco switch configurations (IOS, IOS XE, NX-OS) using CLI, TFTP/SCP, terminal emulation, and GUI. Step-by-step guidance to prevent downtime and ensure network resilience. Cisco recommends that you have knowledge of these topics and have the required access: Access to a Trivial File Transfer Protocol (TFTP) or File Transfer Protocol (FTP) server. These procedures are straightforward and only consist of a few steps. What is FTP?

What is FTP?

FTP stands for File Transfer Protocol, and it is a network. The Backup Configuration File or log of the switch is useful for troubleshooting or if the device accidentally gets reset. This contains manual copies of files used for protection against system shutdown or for the maintenance of a specific operating state. Example here: <https://community.com/t5/network-management/automatic-backup-using-eem/td-p/1876471/page/2>.
