

# Comprehensive Maintenance of Optical Cable Lines

## Overview

Monthly Maintenance: Randomly inspect fiber optic cable connections, test backbone fiber optic link attenuation, and clean connector end faces. 25 deals with general features in relation to the maintenance and operation of optical fibre cable networks. This article will explore the three core stages: fiber optic cable selection and installation, usage and maintenance, and aging assessment and replacement. Small oil micro-deposits and dust particles on fiber optic cable optical surfaces may cause a loss of light or degraded signal power which may ultimately cause intermittent problems in the optical connection. These networks enable lightning-fast data transmission, supporting everything from internet browsing to high-definition video streaming and beyond.
