

Connecting a disk array to Fibre Channel

Overview

Zone a Fibre Channel array to the tier, add a disk, create a LUN, and register the LUN to the tier. In Add Storage Devices Wizard > Select Provider Type, select Fibre Channel fabric discovered and managed by an. Virtual Fibre Channel provides Hyper-V VMs with direct connectivity to Fibre Channel-based storage. For basic setup information such as racking, power cabling, and recommended handling procedures, see the Getting Started Guide for your Storage Array at. In preparation for configuring your Fibre Channel SAN and setting up the system, review the requirements and recommendations. systems support the SAN storage hardware and firmware combinations you use. This is followed by a description of what needs to be configured (which is almost nothing) to connect a Windows Server to a disk array via an FC SAN.
