

Connecting a standard switch to a gigabit fiber optic cable

Overview

Most modern fiber-enabled network switches require an SFP transceiver module featuring a duplex (two strand) multimode OM3 or duplex single mode OS2 connection with LC connectors. Direct attach cables with pre-terminated SFP connections may also be used. Download the. In this article, we'll explain how to connect multiple Ethernet switches using fiber optic cables and the equipment required for this to work. Fiber optic technology is widely used in networking due to its high-speed data transmission capabilities and long-distance coverage. This guide will. The switch must be powered on. Connect the management cable into the management port on the switch. The objective is to run 1 or 2 additional optic fibre from the. Other than entry level network switches, most of today's network switches include one or more GiBC (Gigabit Converter) or SFP (Small Form-factor Pluggable) slots.
