

Core switch and router are not communicating

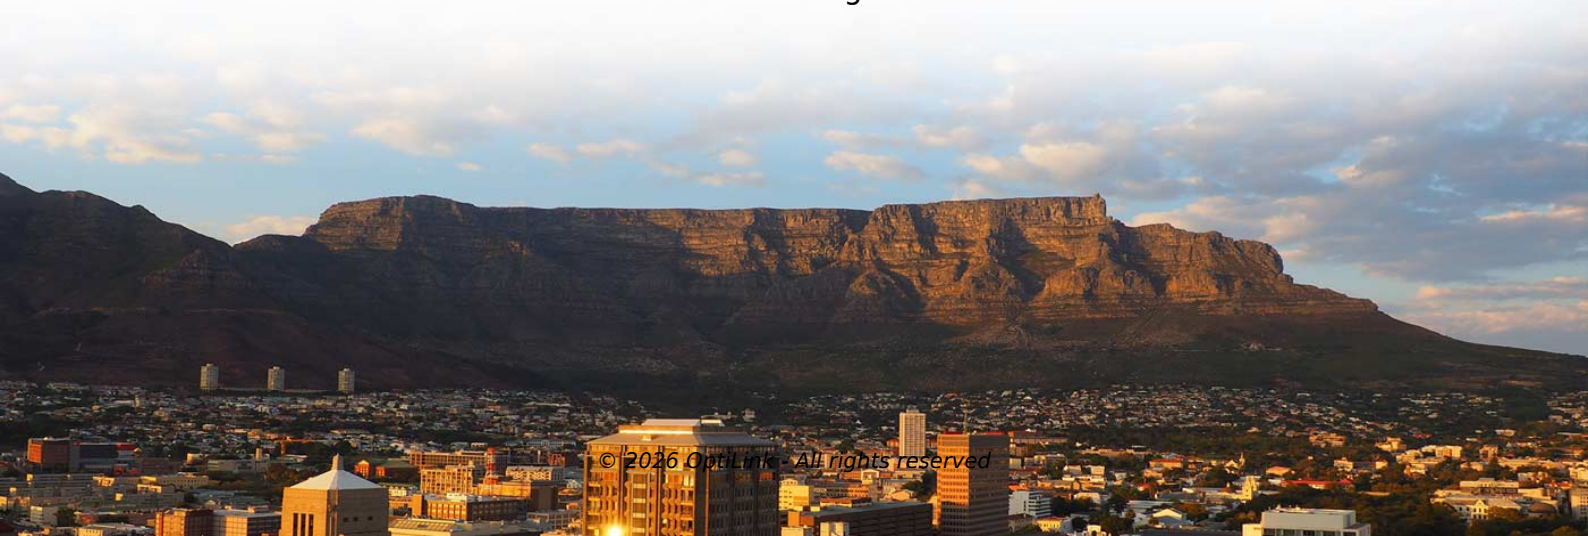

Overview

If devices are connected but not communicating, check network connectivity. ☐☐ Ping the router/switch from a computer: `nginx CopyEdit ping 192. 1 Reply received → Device is reachable. Request timed out → Possible hardware or configuration issue. Make sure that is reflected in your config: 11-26-2021 12:14 AM - last edited on 11-27-2021 11:50 PM by Translator Hello, not sure if this is a typo ?`

According to your configuration, the WAN. Abstract: Learn how to troubleshoot and resolve common issues with connecting a network switch to a router. In this article, we will discuss the steps to troubleshoot a network switch router connection issue. A device can be pinged from core switch (router) but not the switch it's plugged into. Why?

Our school district has A/V devices in every classroom. What Causes. We have a pair of Dell N3224P-ON switches and today's morning my colleague gave me a task and instructions to remove some unused VLANs. We already rebooted both. Corrected but still no internet access on Core Switch You can use the “show ip nat” commands on the router to find out what is and is not working.
