

Cost Standard for High-Speed Optical Cable Laying

Overview

Total Project Costs: For commercial installations, expect costs ranging from \$5,000 to \$20,000 per mile for underground projects and from \$40,000 to \$60,000 per mile for aerial installations. With prices ranging from \$1 to over \$ 50 per linear foot, depending on the installation method, understanding these costs helps make informed decisions about this essential connectivity investment. The main cost drivers include material type, run length, trenching or aerial work, and any required permits or inspections. This guide provides clear cost estimates, price ranges. Fiber optic construction is a cost-effective way of bringing network access to areas with significant end user voice, video, and data traffic. This guide will walk you through the key factors.
