

Cost of laying optical cables in trenches

Overview

Armored fiber optic cables designed for direct burial cost \$6-14 per linear foot. Conduit systems add \$2-4 per foot but allow future cable additions. The main cost drivers include trenching or aerial deployment, materials, labor hours, and any required permits. This guide presents typical price ranges in USD to. If you install underground fiber, pricing your HDD work right is the fastest way to protect margins without sacrificing win rate. Whether you're expanding your data center, connecting multiple buildings, or future-proofing your connectivity, accurate pricing information helps you budget effectively. In contrast to “classic” civil engineering, in which an open trench is dug and the pipes are laid at least one meter deep, alternative laying techniques require less depth – and ideally almost no large.
