

Customized Solution for Intelligent Distribution Boxes

Overview

Customized services: Provide voltage, size and function customization based on customer requirements, compatible with power grid standards of various countries (such as 110V/220V/400V). Global market performance and customer recognition. Digital technologies such as Cloud Computing, Big Data, Internet of Things (IoT), Artificial Intelligence (AI) and Industry 4.0 are phenomenon which are changing the world we are living in. To answer the most demanding market. Our client is a Germany-based company with over 20 years of experience in the catering equipment and kitchen accessories industry. With an extensive distribution network across Europe, the company has established a strong presence in multiple markets and continues to expand its product portfolio. Our intelligent and mechanical boxes in the area of power and data distribution offer modular solutions for all voltage levels and at the same time optimize functionality - for maximum efficiency with maximum safety. As a pioneer of the power and data distribution of the future, LEONI always keeps. Huawei's Intelligent Power Distribution Solution contributes to the implementation of transparent sensing of power distribution transformer districts and the enhancement of intelligent service capabilities, providing users with a greener, more stable and safer power consumption experience. CHINT provide one-stop Intelligent Power Distribution Solutions solutions.
