

Customs Clearance High-Speed Optical Connector QSFP-DD

Overview

Amphenol ICC's QSFP DD interconnect system is comprised of a 76-position, 0.8mm pitch connector built for use in high speed serial applications. The QSFP-DD family supports legacy QSFP channels on the front interface and four additional channels on the rear interface. In other words, a total of 256 differential pairs with 32 ports delivers double-lane density within the same form factor. Customers can upgrade their box in advance of new cables. Abstract: This specification defines: the electrical and optical connectors, electrical signals and power supplies, mechanical and thermal requirements of the pluggable QSFP Double Density (QSFP-DD) module, connector and cage system. The cage and connector design provides backwards compatibility to. The QSFP-DD Series offers up to 400Gbps transmission speeds and features 1-by cages. 4 Tbps aggregate bandwidth in a single switch slot. QSFP-DD electrical interfaces will employ eight lanes that operate up to 25 Gbps NRZ modulation or 50 Gbps PAM4 modulation, providing.
