

Distribution box model GXL-

Overview

The GXL series low-voltage distribution box (cabinet) is suitable for power or lighting power distribution in the three-phase, three-phase, three-phase, four-line, three-phase, five-line power distribution series of industrial and mining enterprises, commercial and service. The GXL series low-voltage distribution box (cabinet) is suitable for power or lighting power distribution in the three-phase, three-phase, three-phase, four-line, three-phase, five-line power distribution series of industrial and mining enterprises, commercial and service. The GXL series low-voltage distribution box (cabinet) is suitable for power or lighting power distribution in the three-phase, three-phase, three-phase, four-line, three-phase, five-line power distribution series of industrial and mining enterprises, commercial and service industries as well as. We have CNC automatic equipments and advanced machines for the working lines. More than 10 professional engineers and skilled technicians guiding with scientific management, we have succeeded in producing high effective products compliant with CE Standard. GXL series low-voltage power distribution and control box adopts standard modular design, with compact box structure and high universality, and the width, height and depth of the box can be expanded according to the standard module ($E=25\text{mm}$). They are commonly used for concealed installation in Residential Suites or corridor walls. They vary in terms of materials, including metal and flame-retardant plastic; installation methods, such as vertical, hanging, concealed, or exposed installations; and voltage levels, including 380V and 220V.
