

Distribution box restrictions

Overview

You can use the Exchange admin center (EAC) or Exchange Online PowerShell to place restrictions on whether messages are delivered to individual recipients. Message delivery restrictions let admins control which senders can reach specific mailboxes by configuring accept and reject lists. However, there are ways to safely allow these external emails so you, your users, and your partners can collaborate efficiently. To allow external senders to email a distribution group, you can perform. Microsoft 365 is designed to enhance collaboration and productivity, with tools like shared mailboxes and distribution lists playing a critical role in business communication. For instance, you can set up a mailbox to accept or decline messages from particular users or to accept messages solely from people within your Exchange.
