

# Does a whole-house fiber optic system require a panel

## Overview

In practice, a fiber network has no limitations in transmission distance, and therefore, no connection rooms, switches and panels are needed on every floor or every building. Establishing space for node rooms, equipment, cross-connection panels and switches at each level is a significant cost, often up to 70% of the total cost of the network. Once you understand the basic concepts, you can check out my Recommended Equipment section toward the bottom of the. Fiber-optic is delivered via a cable, either from underground or an aerial power pole, that goes right into your house. This is called Fiber to the Home, which is just what you want if you can get it. Your internet service provider will bring it right to your door. Electrical Breaker Panel: Powers the ONT and keeps everything running.
