

# Does the Huawei 910 use an optical module

## Overview

The device must use optical modules recommended on the configurator because non-Huawei-certified optical modules cannot ensure transmission reliability and may affect service stability. Describes what an optical module is and FAQs, including the fundamentals, appearance and structure, key performance counters, common types, and naming conventions of optical modules, causes of optical module failures and corresponding protection measures, types of optical modules supported by. nstalled easily and configured flexibly. It supports the convergence of up to 6 radio links, nd supports multiple protection schemes. The OptiX RTN 910A provides a generic platform for TDM/Hybr d/Packet/ Routing microwave transmission. Currently, SFP modules also have the preceding functions.
