

Enable the optical port on the H3C switch

Overview

Enable Optical Port: Execute the command `combo enable fiber` to switch to the optical port. The physical state and link protocol state should now be 'UP', and the 'Media type' should reflect. System view, Ethernet port view `ratio`: Maximum ratio of the received broadcast traffic to the total bandwidth on an Ethernet port. The value ranges from 1 to 100 (in step of 1) and defaults to 100. `max-pps`: Maximum number of. This video provides a comprehensive guide on configuring and troubleshooting Combo ports on H3C Ethernet switches. The demonstration illustrates how to configure Combo. In H3C network devices, a combo port (optical-copper multiplexing port) is a multifunctional interface that integrates two physical media: optical fiber and copper cable. In H3C switches, you can set the user's access level using the "class" command. For instance, to grant the user full. Add the specified port to the current VLAN Configure the link type of the port as Trunk type Allow the specified VLAN to pass through the current Trunk port Set the default VLAN for the trunk port Configure the link type of the port as Hybrid View the VLANs that exist on the current switch View the.
