

Estonia High-Speed Optical Electronic Connection 40G

Overview

The 40G QSFP optical module is a compact hot-swappable light module with four transmission channels, each with a data rate of 10Gbps, and is compliant with sCSI, 40G Ethernet, 20G/40G InfiniBand and other standards. Driven by the demands of cross-domain disaster recovery in cloud computing, 5G backbone network transmission, and wide-area data interconnection, 40G optical modules need to balance short-distance high density with long-distance breakthroughs. ETU-LINK has expanded to include an 80km. The Estonian Digital Agenda 2030 focuses on developing digital public services, cybersecurity and improving connectivity across the country. The Estonian Broadband Plan 2030 describes actions to achieve goals set by the Estonia's Digital Agenda 2030. The process of digital connectivity deployment. The 40G transceiver module portfolio offers customers a wide variety of high-density and low-power 40Gigabit Ethernet connectivity options for datacenter, high-performance computing networks, enterprise core and distribution layers, and service provider applications. Creating a detailed plan for the implementation and deployment of the network.
