

# Fiber Optic Cable Line Estimation

## Overview

The Fiber Cabling Project Cost Estimator below will give you an instant, general estimate for your fiber network cabling project. Call 800-614-4560 or contact us here if you need help with this. After entering your values, please ensure you click the 'Calculate Link Loss' button at the bottom of the page to generate your total link loss. This step is necessary to see if your system falls within. Calculate link or channel loss and determine the supported applications and max lengths for the configuration. The configuration and results can be exported as PDF. Fiber length takeoff starts with a. Typically, per drop fiber cabling prices range from \$250 - \$1000 per drop depending on the type of fiber (OM2, OM3, OM4, or OM5), multi or single mode, PVC or plenum, average drop length, and also the number of fibers in each cable. The loss budget is the sum of the average losses of all the components, including fiber optic attenuation, connector loss, and splice loss.
