

Fiber optic patch cord two wires

Overview

Fibre optic patchcords are single-, dual-, or multifibre data cables that are factory-assembled with the commonly used fibre optic connectors – LC, SC, E-2000, MTP, SN, CS, MDC, etc. – and are used to connect IT hardware (e. switches, servers) equipped with fibre optic interfaces either directly. At ZION Communication, we design and manufacture a full range of fiber patch cords for: This guide will help you quickly understand the main types of fiber patch cords and how to choose the right solution for your project – and how ZION can support you with stable quality, flexible customization. A fiber patch cord, also known as a fiber patch cable, fiber jumper, or fiber patch lead, is a fiber cable of a specific length terminated with fiber optic connectors at both ends. These connectors enable quick connections of fiber optic patch cords to optical switches, telecommunications networks. Fiber optic patch cables are indispensable components of modern fiber optic systems. They are generally sold in large quantities, rather than custom -made, although quite special models are also.
