GP Extinction Ratio Tester

Overview

GoPhotonics has introduced an expanded range of Polarization Extinction Ratio (PER) Meters, offering advanced solutions for precise polarization characterization, alignment, and testing in fiber optic and photonic systems. The ERM-202 is a rotating-polarizer polarization extinction ratio meter. It is available in single or dual channel versions. As polarization control becomes increasingly critical in high-performance. The ERM-202 is a dual channel polarization extinction ratio (PER) meter specifically designed to simultaneously measure the PER and power ratio of a device with two polarization maintaining (PM) outputs, such as a Y-branch fiber gyro IOC, PM coupler (PMC), or polarization beam splitter (PBS), as. The ERM-202 is a dual channel polarization extinction ratio (PER) meter specifically designed to simultaneously measure the PER and power ratio of a device with two polarization maintaining (PM) outputs, such as a Y-branch fiber gyro IOC, PM coupler (PMC), or polarization beam splitter (PBS), as. Luna's ERM-202 is a single or dual channel polarization extinction ratio (PER) meter.
