

Gabon Bridge Construction Team

Overview

In Gabon, BESIX is making solid progress on a major infrastructure project, including the design and build of various bridges and footbridges. While groundworks for the Ebel-Abanga bridge are in full swing, a second footbridge was installed in the capital Libreville on Saturday, 2 August 2025. The deal was signed last February, but the start of works was delayed while the Gabonese government put the necessary funding in place. (MATIERE) opened the first footbridge in Libreville in the presence of Gabon's Minister of Public Works! This is part of a broader. The Komo Bridge is built along the main commercial route leading to the capital of the country, Libreville, where half of Gabon's population is concentrated. Schedule a demo to see how your sales teams can generate leads. On December 23, a final taking-over certificate was issued by the Ministry of Public Construction, Equipment and Infrastructure of Gabon for Port Gentil-Omboué Road and Booué Bridge Project (hereinafter referred to as the "PO Project") undertaken by CRBC, and the PO Project was formally handed over.
