

German Fireproof Cable Tray Models

Overview

They are available in perforated (RG) or non-perforated (R) versions, in heavy-duty versions (RS/RGS), for use under sprinkler systems (RGL) or as installation cable trays (RI/RIS). Meka Pro has tested and continues to test its products and cable management systems' fire resistance with the cables installed and connected according to the temperature curve in the EN 1363-1 standard. Meka Pro's manufacturer assurance is based on tests that are carried out, not just on simulation. RSLC 300 Joint bar, width 239 mm, for bottom stabilisation, Stahl, bandverzinkt DIN EN 10346, inkl. Zubehör Fire protection technology plays a central role in ensuring the safety of people and buildings. In the event of a fire, it is necessary to maintain the functionality of certain electrical installations, such as. If a fire occurs in buildings, the ultimate goal is to save human lives. Which is why we attach great importance to the continuous search for installation-friendly solutions capable of guaranteeing the functioning of vital electrical wiring including fire alarm systems, emergency lighting and other. Cable trays are an integrated, highly flexible cable support system when used in combination with the matching support structures, covers and system-specific accessories.
