

Green casing of the distribution box

Overview

This structure is a type of distribution transformer, designed to replace the overhead pole-mounted units used in older neighborhoods and is enclosed in a robust, tamper-resistant metal housing, often painted green or gray. The large, green metal box sitting low to the ground in a yard is a common sight in modern suburban and residential neighborhoods utilizing underground power distribution. They serve a vital role in managing and distributing. In the power system, the **green electrical box** usually refers to the **low-voltage distribution box** or **power distribution cabinet** used outdoors, and its color design is mainly related to functions, safety signs, and environmental adaptation. The following is a detailed explanation: ### I. Common in residential, commercial, and industrial areas, it ensures efficient power delivery, overload protection, and voltage conversion within local electrical distribution systems.
