

Grenada Residential Low-Voltage Distribution Box

Overview

This 8-module surface-mounted distribution box features IP65 waterproof protection and flame-retardant, impact-resistant plastic construction. Designed for both indoor and outdoor use, it includes a transparent window for easy breaker status monitoring and a complete installation. The underground transformer is a new type of compact substation equipment that combines a transformer, high-voltage load switch, fuse, and other components. It is installed in a pit, does not occupy surface space, and can operate submerged in water for a period of time. The outdoor switch device in. The GGJ-type low-voltage distribution reactive power compensation integrated cabinet is a new-generation outdoor distribution cabinet designed based on the principles of safety, economy, rationality, and reliability. It is suitable for urban and rural grid renovations, industrial and mining. Access official applications, Acts, and regulations that guide Grenada's electricity sector.
