

Haiti Fiber Optic Cable Construction

Overview

Two years after Haiti was struck by a devastating 7.0 magnitude earthquake, the country is set to receive a major boost with the delivery of a US\$16m 200km undersea cable which will link the country to the world via internet connectivity, thanks to Digicel. The project - which is being undertaken by Digicel Group, a mobile network operator in the Caribbean, Central America and Pacific, was launched in Haiti in 2005 with the commitment to best value, network and service. What does a fiber optic undersea link to Haiti mean for you the Haitian consumer?

Fiber optics means NO MORE ECHOES - How many times do you call Haiti and keep shouting. The public-private partnership is expected to modernize Teleco, help improve the company's technical and financial capacities, modernize its infrastructure and implementation of public-private partnerships. This support comes in the form of public. 6Wresearch actively monitors the Haiti Fiber Optical Cable and Cable Assembly Products Market and publishes its comprehensive annual report, highlighting emerging trends, growth drivers, revenue analysis, and forecast outlook. Our insights help businesses to make data-backed strategic decisions.
