

High Temperature Resistance Solution for Nordic Outdoor Communication Power Supply Cabinets

Overview

EPDM (Ethylene Propylene Diene Monomer) sealing strips are used, with a temperature resistance range of -50°C to 150°C and a compression rebound rate of $\geq 80\%$. They maintain sealing performance for a long time, preventing the intrusion of humid and hot air. ESTEL designs each Telecom Power System and outdoor telecom cabinet to adapt to these challenges. ESTEL's dedication to quality, innovation, and international standards ensures your equipment. KDST delivers safer, smarter, and more efficient outdoor cabinet solutions, engineered to protect sensitive equipment in any environment. We design and manufacture high-quality custom enclosures, while providing professional assembly, system integration, and tailored support services for telecom. Protect Your Electrical Equipment with AZE Telecom's Weatherproof Outdoor Telecom Enclosures In today's connected world, protecting your electrical and telecom equipment from harsh outdoor conditions is critical. In addition to traditional cooling methods, Delta's new hybrid cooling options revolutionize the cost structure of thermal management. Our outdoor cabinet heat exchanger 150w provide high-efficiency, energy-saving thermal management for outdoor cabinets, telecom enclosures, battery cabinets, power distribution boxes, and other sealed electronic housings. Designed for harsh outdoor environments, these units offer reliable cooling. According to different geographical environments, we have 3 different solutions: 1.
