

High-density low-voltage cable trays new models available now

Overview

These trays, meeting sector-specific needs with a robust structure, feature a covered design, interlocking splicing options, and wire tray structures to facilitate high cable density. In addition to sheet metal material, demands for stainless steel material are also met. ABB designs and manufactures cable tray systems, including perforated tray, cable ladder, channel tray and strut (metal framing), directly from production facilities in Canada and Saudi Arabia. It is constructed of precision-engineered, high-quality welded steel wire and is the result of decades of research gained from the installation of over 160,000 miles of tray across the globe. Our tray features our. MP Husky is a founding member of the USA Cable Tray Institute and the leader in US cable tray systems and cable support systems.
