

How much does a ground-mounted photovoltaic cable tray cost

Overview

The average homeowner can expect to pay between \$27,000 and \$60,000+ for a ground-mounted solar system. Note: Depreciation savings are based on a 24% federal tax rate and do not include any depreciation on state. NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. A high-performance option for coastal regions, chemical plants, or environments with strong salt, moisture, or industrial. Ground-mounted solar panel systems usually cost about 51% more than rooftop solar, according to 2026 EnergySage data. You need a lot more equipment, which adds up. Enter your postcode to compare quotes from leading professionals. 50 per watt, depending on factors such as project size, location, site conditions, and the type of mounting system used.
