

# How to configure a router to connect to fiber optic internet using a fixed IP address

## Overview

To set up your router for fiber internet quickly, connect the router to your fiber modem, access the router's settings via a web browser, and input the provided ISP credentials. Make sure to update the firmware, configure Wi-Fi security, and customize your network name for optimal performance. As far as I understand, I need a PPPoE username and password to connect. I never received it from Telekom, as well as Access number (Zugangsnummer). Maybe I'm wrong and the connection. In this guide, we'll explain router compatibility, setup steps and whether upgrading your router is necessary to maximize fiber speeds. This can be done in two ways: Underground Installation - Fiber cables are placed in conduits underground, offering better protection from weather and physical damage. In this article, we'll show you how to set up.
