

How to open and close the side door of a network cabinet

Overview

The sides of the cabinets should be close, but do not need to touch each other yet. This section describes how to open the Cisco 1240 Connected Grid Router (CGR 1240 or router) door so that you can access the interior of the chassis. To access the router interior, you must open the router front door. But the back. NOTE: Door is push-to-close. PANDUIT recommends closing handle after opening door and simply push door when closing Door Function Adjustment (optimize door operation) 866-405-6654. Opening the cabinet correctly ensures easy access to the internal components while maintaining the integrity and. How to assemble a double section wall mounted network cabinet server rack?

- 1, Insert top and bottom panels into the side frames.
