

Huawei 48-port switch in aggregation layer

Overview

CloudEngine S6750-H series 10GE switches are Huawei's next-generation enterprise-class switches designed for core and aggregation layers, with 48 × 10GE downlink optical ports and 8 × 100GE uplink optical ports. They feature high performance, high reliability, cloud management, and intelligent O&M. Core switches set up a CSS that functions as the core of the entire campus network to implement high network reliability and forwarding of a large amount of data. A Huawei 48-port switch is a fixed-configuration Ethernet switching platform offering exactly 48 physical RJ45 or SFP-based interfaces—designed primarily for wired endpoint connectivity in structured cabling environments. It features 48 x 10/100/1000BASE-T ports for high-speed data transfer and 4 x SFP+ uplink ports for high-bandwidth connectivity. "Feature Typical Configuration Examples" provides typical configuration examples of a single feature on a switch.
