

Huawei Photovoltaic Inverter Communication Module

Overview

Huawei Smart Dongle SDongleB-06-EU is a state-of-the-art 4G LTE communication module designed for remote monitoring and management of Huawei SUN2000 series inverters. The SUN2000 can connect to the SmartLogger or to a PC through the SmartLogger to implement RS485 communication. With PLug & PLayer, easy. Imagine a solar power system that talks to itself, automatically adjusts energy flow, and reports real-time performance to your smartphone. In this guide, we'll explore how this advanced communication. Huawei Smart Dongle solar communication module is a compact wireless communication device engineered for EPC contractors, commercial solar installers, and utility-scale system integrators requiring reliable inverter connectivity and remote plant monitoring. It's designed to be user-friendly, offering plug-and-play installation and compatibility with the FusionSolar app.
