

Huijue Core Switch 28 Ports

Overview

ECS4120-28Fv2 is a high-performance Gigabit Ethernet switch featuring 28 ports, with 20 x GE (Support DDM) SFP+ 4CG + 4 10G SFP+ ports. DS-3E3700-H Series provide 24 or 48 Giga and 4 fixed 10GE ports onboard with one expansion slot. The high port density satisfy the requirements for hybrid configuration of copper ports and fiber ports at the distribution layer in large sized networks or at the core layer in SMB sized networks. The RG-S5750-H Series offers fixed 4 10G fiber ports. Users can flexibly choose 10G fiber or copper ports in various quantities to meet their actual deployment needs. Thanks to its -40 ~ 85°C wide operating temperature it can operate reliably in extremely harsh environments. Designed with 16 Gigabit ports, 4 x 10GbE SFP ports.
