

Huijue Distribution Box Low Voltage Circuit

Overview

The Huijue HJ-501 Low Voltage Electrical Distribution Box is designed for efficient, safe, and reliable power management in both residential and commercial environments. Crafted from high-quality stainless steel and steel sheets, this distribution box offers superior durability and corrosion.

Company Introduction: Established in 2001, Shanghai Huijue Network Communication Equipment Co. The headquarter of HJ Network including the R&D center, technical center, prototype.

A Low Voltage (LV) Distribution Box, also commonly known as a Distribution Board (DB), panelboard, consumer unit, or fuse box, is an electrical enclosure that serves as the central point for distributing and protecting the final circuits within a building. It takes one large incoming electrical.

RCD/RCCB Integration: Built-in Residual Current Devices (RCD) or Residual Current Circuit Breakers (RCCB) provide protection against earth leakage and electric shocks.

Multi-Circuit Support: Can manage multiple circuits simultaneously, enabling organized power distribution across lighting, outlets.

As one of the leading Low Voltage Distribution Box manufacturers and suppliers in China, we warmly welcome you to buy or wholesale high quality, advanced and durable Low Voltage Distribution Box made in China here from our factory. We're happy to provide you with low price factory quotation and.
