

Inquiry about 100G SFP optical modules

Overview

Featuring 100GBASE-FR1 optics with dual-lane PAM4 modulation at 2x53. Our 100G SFP-DD long reach transceivers enable extended distance connectivity for metropolitan and. The advent of the 100G SFP112 optical module with its innovative design fulfills the growing demands for both current and next-generation high-speed network transmission. This single-channel transmission solution leverages PAM4 modulation technology, converting one electrical signal into one. The Cisco 100GBASE Quad Small Form-Factor Pluggable (QSFP) portfolio offers customers a wide variety of high-density and low-power 100 Gigabit Ethernet connectivity options for data center, high-performance computing networks, enterprise core and distribution layers, and service provider. The NEC's 100G SFP112 achieves 100Gbps transmission with a size equivalent to existing SFP modules. By downsizing the 100Gbps interface to a smaller SFP size, it allows for improved port density in devices. The optical signals back into electrical signals.
