

Inspection Items for Distribution Cabinets and Boxes

Overview

The inspection includes checking all cable terminals and connections item by item after unpacking, and also observing the condition of the sealing strips and gaskets of the stainless electrical cabinet enclosure, checking for signs of corrosion or deformation. QuestionWe have been inspecting equipment according to NEN 3140 for some time. Verify that cabinets in walls do not have excessive gaps at the edges and are flush with the finished surface or, if surfaces are noncombustible, within 1/4 in. Inspect for any physical damage to the enclosure. Internal Inspection Open. Forget cookie-cutter checklists - we're talking about the real, practical inspection points that determine whether a distribution box will perform flawlessly for decades or become an electrical hazard in five years. Picture an audit like a health check-up for manufacturing. LV distribution boards, pillars and cabinets comprise of three main components: The. Plastic inspection wall port, with zinc plated sheet steel frame. Pair of mounting brackets for 3/4" and 1" dual distribution manifolds 356, 356 IS and 357 series. Pair of stainless steel mounting.
