

Installation of fiber optic cable conduit in the Democratic Republic of Congo

Overview

The Democratic Republic of Congo (DRC) has launched a €66.55 million fibre optic cable project, a significant leap towards enhancing its digital infrastructure. Funded by the African Development Bank (AfDB), the initiative boosts the country's ambition to become a digital hub in the region. The project consists in the construction of 10,000 km of fibre-optic cables as part of a regional backbone in 5 countries, including backbone as well as metro networks. 5 million people living in the eastern regions of the Democratic Republic of the Congo (DRC) will benefit from faster, cheaper and more reliable digital connectivity thanks to new fibre-optic network investment being rolled out by Bandwidth and Cloud Services Group (BCS) and backed by OTTs and telcos, such as Facebook or Orange, supported by funders and African governments, have joined forces to accelerate the deployment of high-speed connectivity infrastructures. Submarine cables, landing stations, and backbones, are essential infrastructure to develop connectivity and. SOCOF and APCSC to deploy fibre along new roads in the DRC Congolese Fiber Optic Company (SOCOF SA) has reportedly signed a partnership with the Agency for the Coordination and Monitoring of Collaboration Agreements (APCSC) to deploy optical fibre networks along new roads to be built in the. The Democratic Republic of Congo (DRC) has launched a €66.55 million fibre optic cable project. Subsea cables are the global backbone of the Internet, connecting people, businesses, and economies around the world.
