

Intelligent Distribution Box Sample

Overview

The intelligent distribution box is characterized by comprising: at least one PCB circuit board, mounted in a groove of the standard guide rail and embedded with multiple printed parallel wires used to realize parallel connection between circuits and/or data lines between the. The intelligent distribution box is characterized by comprising: at least one PCB circuit board, mounted in a groove of the standard guide rail and embedded with multiple printed parallel wires used to realize parallel connection between circuits and/or data lines between the. Digital technologies such as Cloud Computing, Big Data, Internet of Things (IoT), Artificial Intelligence (AI) and Industry 4. 0 are phenomenon which are changing the world we are living in. To answer the most demanding market. The intelligent distribution box comprises multiple electrical devices, the electrical devices at least comprising a common power supply module, a main input intelligent circuit breaker, at least one branch intelligent circuit breaker, a central processing unit, and a standard guide rail. The. • One IoT platform for IT and OT data integration of all departments. • 5 in 1: hardware-based platform, app-based software, software and hardware decoupling, on-demand service deployment, meeting service evolution requirements such as new energy • High-reliability HPLC: Power services are carried. These Distribution Boxes enable decentralized installation of the electronics close to the load. The range of applications extends from pure energy distribution in buildings to building automation and through to industrial plants. SMART DISTRIBUTION BOXES FOR FLEXIBLE BUILDINGS. Wieland is your. Our intelligent and mechanical boxes in the area of power and data distribution offer modular solutions for all voltage levels and at the same time optimize functionality - for maximum efficiency with maximum safety.
