

Intelligent Micro-module for Dynamic Environment

Overview

The Intelligent Micro Module solution proposes an innovative concept of proactive O&M to monitor, in real time, key, vulnerable components such as batteries, capacitors, air-conditioning fans and valves, and then generate a health assessment report. The modular architecture can be easily assembled on-site to complete business delivery, which can save 50% of the delivery time and personnel investment compared to the traditional construction mode, facilitating fast delivery and low carbon emissions. Popular Micro Modular Data Centers The modular data center, comprised of micro modules, has become more and more popular. Through TDK's collaboration with Texas Instruments (TI), the i3 Micro Module integrates the TI SimpleLink™ platform, featuring the CC2652R7. Highly integrated and flexible installed data center infrastructure for rapid deployment and efficient operation and maintenance Inspur intelligent micro module product adopt factory prefabrication production and on-site modular installation technology for rapid deployment and flexible expansion. With the micro-module computer room as the core, the system. Micro module data center SDC300-M solution is a rapid, efficient, convenient, intelligent management,integrated data center solutions that be released for fast demand of cloud computing, big data, Internet of things. It Integrated Sunsea's efficient and reliable power precision distribution system.
