

Is fiber optic faster or slower than fiber optic cable

Overview

Yes, fiber optic internet typically offers faster speeds than cable. Currently, two major broadband technologies dominate the market: traditional cable and lightning-fast fiber-optic networks. Cable utilizes familiar copper wiring originally built. Why are optic fiber cables (or the technology) is 'faster' if the speed of electrons is very close to the speed of photons?

: r/askscience Why are optic fiber cables (or the technology) is 'faster' if the speed of electrons is very close to the speed of photons?

Archived post. New comments cannot. This guide compares fiber-optic cable and traditional copper internet cable (coaxial cable) across key factors: technology, speed, reliability, and cost in 2025. A fiber optic cable. Compare fiber vs. TechnologyAdvice is able to offer our services for free because some vendors may pay us for web traffic or other sales opportunities.
