

Is the HTB1100S fiber optic transceiver single-mode or dual-mode

Overview

The HTB-1100S-25KM model allows for quick 25-kilometer distances utilizing Single-mode fiber. All units feature a full metal casing, consume minimal power, and are designed for quick setup (no software needed). Description netLINK Series Fiber Media Converter is the conversion equipment of Ethernet optical-electronic signals between 10/100M UTP interface (TX) and 100M Fiber interface (F X). This lineup combines the best of two worlds – short-haul Multi-mode and long-range Single-mode. It can achieve two different twisted-pair cable and optical fiber transmission medium of transformation, relay base – TX 10/100 and 100 base – FX two different network segments, can satisfy the long distance, high speed and high. The NetLINK HTB-1100S 10/100M Fiber Optic Media Converter is a reliable networking device designed to bridge the gap between traditional copper Ethernet networks and high-speed fiber optic infrastructure. This compact and efficient device converts electrical Ethernet signals transmitted over. Netlink htb-1100s-25km fiber optic transceiver supports 25km transmission distance, 100mbps rate, dual fiber single mode transmission, suitable for small and medium-sized enterprises, monitoring systems and long-distance data transmission needs. Features a commercial-grade external power design for.
