

Is the one with the fiber optic plug a router

Overview

A fiber router is designed to work specifically with fiber optic internet connections, providing faster and more reliable speeds compared to a normal router that typically works with traditional broadband connections. Why Use Fiber Optic Internet?

Before diving into the setup, let's quickly. Now you just need to connect your ASUS router to the ISP router and boom. @Kristijorgji: "Media converters" will not work for you, because they deal with a different kind of network; they're made for Ethernet while it's pretty likely that you have GPON, and that needs more than a media converter;. A fiber optic service will require an "ONT" which connects to the fiber cable, and provides an Ethernet port. The fiber line terminates at the Optical Network Terminal (ONT), which is typically supplied and installed by the internet service provider.
