

# Is the outdoor drop cable an optical fiber cable

## Overview

FTTH Drop Cable is a last-mile fiber optic cable designed to connect the optical distribution network (ODN) to end users in Fiber to the Home (FTTH) systems. In any FTTH (Fiber to the Home) network, the drop cable is the final and most critical part of the optical access network. These cable bridge the gap between an ISP's backbone infrastructure and end-user premises, enabling high-speed internet, voice, and data service in residential. Fiber Optic Drop cable is mostly the single-core, double-core structure, but can also be made into a four-core structure, flat figure-8 structure, reinforcement is located in the center of the two circles, metal or non-metallic structure can be used, the fiber is located in the geometric center of. Fiber optic drop cables are the critical link between the main fiber optic network and individual buildings or residences. It is engineered for high-speed broadband access, low attenuation transmission, and flexible indoor-outdoor deployment, making it a core.
