

Korean GGD power distribution box

Overview

GGD type low-voltage fixed switchgear is suitable for power substation, power plant, factory and mining enterprises and other power users of AC 50Hz, rated working voltage 380V, rated working current 3150A below the power distribution system, as power, lighting and. GGD type low-voltage fixed switchgear is suitable for power substation, power plant, factory and mining enterprises and other power users of AC 50Hz, rated working voltage 380V, rated working current 3150A below the power distribution system, as power, lighting and. The product is of high breaking capacity, rated short-time withstand current up to 50kA. It has the below characteristics of flexible route scheme; convenient assembly; strong practicability and novel structure. The product complies with IEC439< low voltage switchgear and control equipment >. GGD type fixed enclosed low-voltage switchgear is suitable for the power station, substation, industrial and mining enterprises and other power users. AC 50/60 Hz, rated working voltage to 660V, rated working current to 3150A.
